On new page 14 following the claims, please insert the following:

ANTENNA DEVICE FOR COMMUNICATION EQUIPMENT

Abstract of the Disclosure

An antenna device for a computer card device, such as a PCMCIA type card, includes at least a first antenna including a trace on a support element, antenna output means, and a protruding member extending from a housing of the card. The support element, which may include a flexible dielectric film, has a geometric shape that is conformed to the geometric shape of the protruding member.
